Plague inc evolved fungus mega brutal guide.

If your disease ever evolves any symptoms, always devolve them. You still need to keep your fungus hidden. Yes, it is possible. This can also help you to get a higher score as you will win with a lower cure percentage. Fungus can be an extremely difficult level, especially on Brutal, so you'll want to choose the proper genes to help you get through. Other guides suggest starting in Norway to make infecting Greenland and Iceland easier. This boost allows the pathogen to bypass air/water filters, increasing the likelihood it survives overseas travel. The trick to fungus mode is that having any symptom whatsoever will let the world know there's a new disease, and people will start making the cure

too early for you to possibly win. Both of these options will make it harder to cure the fungus. This gene stops cell increases when devolving. You can now stop your remaining Spore Bursts until you get the Spore Hardening ability. You can now stop your remaining Spore Bursts to infect these countries without having to wait for the fungus to spread naturally. . Aim to devolve the following symptoms for maximum lethal impact: Coughing- DNA Gene - Metabolic Hijack or Cytochrome Surge. Its possible, but incredibly brutal (as the name suggests.) I would recommend buying it, it's a low price, and worth it. A good strategy is to save lots of DNA for the end of the game in fungus mode. Co-authors: 16 Updated: February 23, 2021 Views: 368,874 Categories: Multi Platform Games Medical Disclaimer The content of this article is not intended to be a substitute for professional medical advice, examination, diagnosis, or treatment. Question I followed all of the steps, and I was able to get most of the symptoms you told us to get. Bird 1 can also help due to the fungus in bird droppings. 4 Impede the cure. To create this article, 16 people, some anonymous, worked to edit and improve it over time. Print Send fan mail to authors Thanks to all authors for creating a page that has been read 368,874 times. Focus on those symptoms which lead to casualties. Before the whole world is infected, you should only spend DNA points on transmission and resistances. If people start to notice symptoms with fungus, a cure will quickly be developed and you will most likely lose. China seems to be a popular optioan as the dense population will allow the fungus to spread faster. Each time you purchase a Spore Burst, a new country will be automatically infected. using no genes whatsoever? Is it still possible to do it on brutal mode for all plague types without modifying genes? Mutation Gene - Genetic Mimic or Creationist. [4] 3 Devolve any symptoms immediately. There is a lot of debate as to the best country to start in for the fungus level. 2 Increase transmission. This is just slightly more difficult, as the genes just boost your abilities. Question Can you beat the entirety of Plague inc. This article has been viewed 368,874 times. 5 Start improving your Spore Burst ability. Travel Gene - Suppression. This is especially useful for difficult countries like Greenland, Iceland, and Madagascar. Pulmonary Edema. Because your fungus has infected people but isn't killing anyone yet, a cure is easy to reach. However, I wasn't able to get total organ failure due to lack of DNA. You may want to consider the Transiesion + gene if you are having difficulty with costs to devolve. [1] China seems to be the most reliable option due to its large population, ports, and large land mass. Advertisement Add New Question Question What if I can't think of a cool name for my fungus? Extreme Bioaerosol. At this point, you will be essentially waiting for the fungus to spread. You may have to be patient as you wait for natural infection to other regions first. Cytochrome Surge will give you more DNA from orange bubbles. Since everyone is now infected, don't waste points or time on symptoms which are aimed at spreading the disease. Question This is not working. Keep an eye on symptoms until you can use Spore Burst and Spore Eruption to infect each country. If you haven't infected the entire world, any symptoms which are found will immediately destroy your chances of winning. [2] You will need to devolve symptoms throughout the game. At the beginning of the game, your focus should be on improving the resistances and transmission properties of your fungus. Don't boost planes or ships as the fungus gene is hard to transmit through these methods. Coma. If you're lucky, total organ failure may even mutate at the end. Necrosis (optional if you have enough points). Do not start evolving symptoms until you receive the message that "No one is healthy" and the world has been completely infected by the fungus. You must devolve every symptom until the entire world is infected so no one realizes there's a new fungal disease, and once you get the "whole world infected" pop-up, suddenly use all the DNA points from devolving all the mutated symptoms to make your disease as lethal as possible. Advertisement 1 Improve your resistances. Evolution Gene - Patho-Stasis. After you've updated these to level 1, focus on your Spore Burst abilities before continuing to level 2. Evolve the following abilities: Genetic ReShuffle 1, 2, 3. Environmental Hardening. Evolve the following: Drug, Heat, and Cold Resistance 2. Insanity. When you have the whole world infected and a good amount of DNA saved up you'll want to get 'total organ failure' and gangrene. Question Why do I suddenly stop getting DNA points? Saudi Arabia and South Africa can also generate a win. Ask a Question Advertisement Thanks! Thanks! Thanks! Advertisement wikiHow is a "wiki," similar to Wikipedia, which means that many of our articles are co-written by multiple authors. Genetic Hardening 1 and 2. But this transmission isn't always necessary. This gene stops the increase of DNA costs which you will rely heavily on. Advertisement 1 Use your remaining Spore Bursts, including Spore Eruption, to infect the final countries. Try to save around 100 points for the end to buy the most brutal symptoms. If you don't have this option, pick the boost that will most benefit your starting country. The fungus will automatically develop new symptoms, so keep an eye out to quickly devolve. Pulmonary Fibrosis. If you don't have the following genes available, choose anything else that you prefer or which is close. Other countries you may want to consider starting in are Madagascar or India. This could be because there are no more people left to infect or can be infected. Don't buy any symptoms or allow any to mutate until the whole world is infected. This will allow the fungus to get a bonus in all environments, helping it spread on land. This is useful as all the red bubbles show up immediately when using the fungus's spore abilities. What do I do? Question I do not have access to modifying the genes. The key to surviving is to devolve any symptoms that randomly mutate before the symptoms can raise awareness of your fungus. Or really whatever you have enough DNA to spend on. 2 Choose a starting country. Try to avoid using your Spore Bursts until the likelihood of these countries being the targets is high. It isn't strictly vital, but you could try Latin names which is where most disease names are rooted. Drug, Heat, and Cold Resistance 1. As you wait for the population to die off, spend some of your points to keep the cure at bay. Question I've done everything carefully but I never have enough DNA points to evolve. No DNA points left for symptoms in the end. Metabolic Hijack will automatically pop red and orange bubbles. If you start evolving symptoms too early, the research for the cure will quickly overtake your fungus. Save a few Spore Bursts for the end of the game to infect any hard-to-reach countries. Quickly buy symptoms to beat the cure. Environment Gene - Extremophile. You could also go for something funny that relates to you. Advertisement 3 Devolve any symptoms that mutate. A strategy that has worked for me on every mode there is is to basically just evolve infectivity (like blood, water air, etc.) and NEVER get any symptoms. Once you've upgraded Air and Water you will have the ability to upgrade to Extreme Bioaerosol. You should always contact your doctor or other qualified healthcare professional before starting, changing, or stopping any kind of health treatment. Devolve every symptom that mutates, which will give you 2 DNA points for free. Evolve the following abilities and transmissions in order to help spread your disease. [3] Water and Air Transmission 1. Saving a few bursts can help you get Greenland if you haven't infected it yet. 1 Choose your genes. 2 Wait for every person on earth to be infected. Wait until you get the "No one is healthy" pop-up before evolving any symptoms. Try only buying the first level of these rather than upgrading them to level two unless you see necessary. The Spore Burst ability should be doing a lot of the infection work for you, so you just need to focus on improving the fungus' resistance. If your world looks red and the infected counter stops moving, but you don't see the pop-up, it's likely a natural disaster killed some people. Another helpful tip would be to get immunity to antibiotics, and maybe if you're feeling rich get the climate upgrades. Evolve the following transmissions: Water and Air Transmission 2. This helps the gene cross country borders. Immediately devolve any symptoms that appear while you are improving the fungus. Is there any way to fix this? You want to pick a country with a high population and ports. When the whole world is infected, get rid of transmissions to save DNA. Your plague should be as fatal as possible. The moment you do, they will find the cure really soon. Now that your fungus has been hardened, you can improve the transmission abilities so you can infect other countries easier. Spore Burst is the fungus' special ability, and can make spreading the fungus to other countries much easier. 4 Increase your transmission abilities and resistances. 3 Evolve the most deadly symptoms as quickly as possible. Pneumonia. Total organ failure. As soon as you receive word that your fungus has spread to every person, unleash your worst symptoms upon them.
